

# Impact of cuttings and embankments

Cuttings and embankments impact \_\_\_\_\_ Purposes 1 & 2, SQ 1,2,4,6

I have not marked cuttings and embankments on the above photo as these are unknown but I have attempted to indicate their likelihood on the Annotated Aerial Photograph at the start of this paper. It would seem likely from the undulating nature of the landscape that some substantial cuttings and embankments would be necessary.

Such works would jar against the gentle rolling landforms of the valley above leading up to Cissbury, which can be seen in these photos looking SW NW and N from Upton Down.
